QuickChai

Hyperlocal 10-Minute Chai Delivery for Indian Tech Parks

A pre-seed pitch deck for bringing authentic cutting chai to office desks.

The Problem

Software engineers and startup teams in Bengaluru spend 30–45 minutes walking outside tech parks just to get a decent cup of hot ginger or masala chai. Cafeteria tea is tasteless machine powder, and food delivery apps take 40+ minutes and arrive lukewarm in plastic pouches.

Our Idea & Product

QuickChai sets up micro-hubs outside major tech corridors (Bellandur, Whitefield, Electronic City). We deliver fresh steaming cutting chai in insulated thermal flasks via custom electric mopeds in under 10 minutes.

Early Signal

Last week we brewed chai in our apartment kitchen and delivered 50 cups to friends in Indiranagar startups. Everyone loved the taste and asked when we are launching a daily subscription.

The Ask

We are raising ₹50 Lakh ($60K) to purchase 5 electric scooters, commercial brewing kettles, and fund 6 months of operations.
